About InfoLibrarian Corporation™

InfoLibrarian™ Corporation is a leading provider of metadata management repository and data governance solutions.

InfoLibrarian™ reduces integration and management costs by providing an enterprise registry and search system. This is used for finding the location and meaning of your data; saving time and money by eliminating costs associated with redundancy in effort as well as inaccurate, and unreliable information.

InfoLibrarian™ software helps companies capture, manage, and publish metadata across the enterprise to support master data, data warehousing, data governance, data quality, compliance, business intelligence applications, SOA, and cloud computing infrastructures.

InfoLibrarian's framework™, portal, and open metadata repository, allows you to meet your needs today and provides the flexibility to extend and grow your solution into the future. For more information on our products and services visit:

Software Packages:

- Studio Edition Standalone
- Workgroup Edition
- Departmental Edition
- Enterprise Edition

Professional Services

Pilot projects and proof of concept services engagements

A metadata program development process sometimes involves and requires engagement for discovery and proof of concept services to gather requirements, and define your project road-map.

Once completed, our clients receive tangible deliverables relating to their metadata program including but not limited to:

- Proposal
- Analysis and Discovery
- Development
- Scope
- Program requirements
- ROI

Typical engagements:

- 2 Day POC and Discovery.
- 5 Day POC and Discovery.
- 10 Day Discovery and Design.

Clients benefit greatly from our expertise, and whether or not you ultimately implement your project, your organization will walk away with a tremendous value provided to you at any level of your project.

Working with the InfoLibrarian™ team brings a high level of customer satisfaction every step of the way, including but not limited to: Consulting, systems integration, configuration, customization, training, and support. Our clients consistently enjoy best-in-class solutions.

The InfoLibrarian™ process combines structured in-depth methodologies tailored to individual client needs, with best practices, fine-tuned by highly experienced professionals.

Consulting Services Typically offered by InfoLibrarian™:

- Discovery process.
- Solution design process.
