FOR THE BUSINESS

- Load business terms from spreadsheets, databases or XML
- Map terms to technical metadata
- Organize terms into taxonomies
- Enterprise information asset catalog

The screenshot displays the DGDomain Business Glossary interface. At the top, the breadcrumb navigation shows 'DGDomain' and 'Business Glossary'. Below this, there are three main categories: 'Business General Terms', 'Organizational Terms', and 'Calendar Terms'. The 'Calendar Terms' category is selected, and a detailed view is shown on the right. This view includes the following information:

- Calendar Terms**
- Parent Subject Area:** Data Governance Office
- Parent Category:** Business Glossary
- Type:** DGDomainCategory
- Description:** Common Business Terms relating to the Business Calendar
- Comments:** Type or paste long text comments here
- [Drill Down](#)

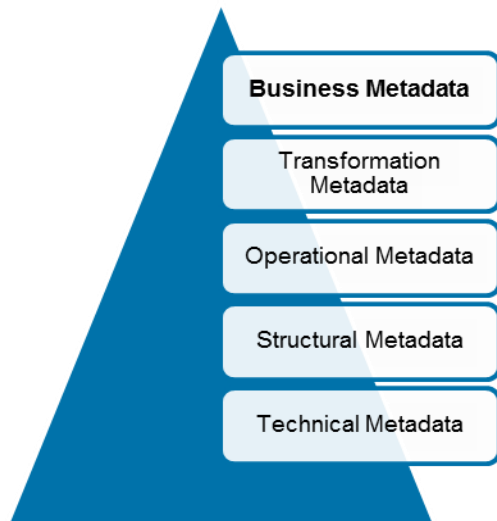

Below the detailed view, there are four links: 'Show Taxonomy Diagram', 'Show where this came from', 'Show dependencies', and 'Show Artifact Complete Details'. At the bottom, there is a table titled 'Business Glossary Business Terms' with the following columns: 'Artifact Name', 'Artifact Type', and 'Business Description'.

Artifact Name	Artifact Type	Business Description
Order Id	Business Term	Master Term For the Order Identification Number

Business users navigate a controlled vocabulary, and drill down to the table or column descriptions of the data containing the metadata details

METADATA EVERYWHERE

- Set up scanning of existing metadata
- Connect the dots between applications and processes
- Enrich metadata via collaboration
- Access content anywhere, anytime

All types of metadata =
good documentation

Full stack of metadata
management features
